

Simple web solutions for complex business problems.

DigiPro Media is helping companies build their next generation web strategy to deliver growth, improve operational efficiency, and maintain web accessibility compliance with the Americans with Disabilities Act (ADA).

Restaurant and Hotel Websites

Our websites are designed to be clean, mobile friendly, and ready for your business. Choose one of our pre-built frameworks or our team can build custom solutions unique to your business.

Franchise Website Solutions

Our solutions allow a business with multiple URLs the ability to maintain branding and control content across all branded websites. Our platform provides a single login for your entire network of websites. And, because it is proprietary, it offers best-in-class security for your business.

Web Accessibility Solutions

Let us evaluate your business website and identify any accessibility issues before you face litigation. Our solution, Adot Pro, provides a first line of defense for businesses that are not currently in compliance.

Online Marketing - Social Media, SEO, PPC, E-Mail

The montage of tactics to increase online traffic and boost business is overwhelming. Schedule a free consultation to see how DigiPro Media can develop a compelling, personalized online marketing strategy to enhance your business exposure and drive growth. We provide full service or training solutions.
